📜 CERTIFICATIONS

- Responsive Web Design, FreeCodeCamp 🔗
- User Experience (UX) Design, Google 🔗
- Microsoft Azure Fundamentals, Simplilearn 🔗
- Natural Language Processing and Text Mining, Simplilearn 🔗

Full Stack Web Developer with 4+ years of experience building end-to-end applications. Skilled in modern frameworks, API integration, responsive design, and performance optimization. Strong in debugging, code quality, and SEO best practices. Effective collaborator and mentor, able to translate complex requirements into scalable solutions. Committed to delivering high-quality software through clean architecture, problem-solving, and user-centered design.

👛 EXPERIENCE

Full Stack Web Developer, Freelance

01/2022 – Current | Remote

- Designed, built, and deployed full-stack applications from requirements to production, delivering solutions across multiple industries.
- Developed responsive front-end interfaces with modern JavaScript frameworks and optimized back-end APIs for speed, security, and scalability.
- Integrated third-party services (payments, authentication, analytics) and implemented SEO, performance, and accessibility improvements to enhance functionality and user experience.
- Collaborated with clients, managed deployments across various hosting environments, maintained CI/CD workflows, and ensured solutions aligned with business goals.

Lead Developer, Kingstone Registrars

01/2025 – 08/2025 | Nairobi (Remote)

- Led development of a certificate registration and verification platform, designing the backend, database schema, APIs, and core system architecture for secure, scalable performance.
- Built the admin dashboard, public search interface, and automated validation workflows to streamline operations and enhance usability.
- Communicated effectively with stakeholders through progress, risk, and solution updates while resolving critical bugs and performance issues, and mentored junior developers through code reviews, training, and technical guidance to improve team productivity and reliability.
